Morrison's Patent

purchased the Right for Adams county of Morrison's Patent Portable Fence, a simple frame to connect the pannels of fence, by which the use of posts is dispensed with, and at about one-third the usual cost. This frame is held together by means of a simple bolt connecting the pannole, and keeping them in an upright position; then, by driving two pins into the ground, thro' the ends of the sills, the fence is made perma-nent, as well as portable. It requires but little skill in its construction, and takes but half the time required to make a common board fence; the frames are made without a single mortice, the pannels are nailed up with strips on each side, and can be set up in a few moments. It stationary fence, as it is easily and readily moved tionary is used-and from the fact that middle fences can be entirely dispensed with by merely using portable fence for pasture lots alone.

By this process one-third of the grass is saved that is generally overrun in pasturing, by merely fencing the quantity required, besides saving

at least five acres of land to the hundred that is necessarily taken up with feace when stationary fence is used for inside fencing, all the land be-ing farmed alternately, it gives no chauce for briers and other rubbage that usually grow up along fences. This fence can be used to grea advantage on low or wet land, where it is difficult to set posts, merely requiring longer pins than for dry ground. The advantage also, of moving the fence, when streams overflow, that are likely to float it off, and the convenience it affords, in fearing pasture and other lots, for stock, enclosing grain stacks, &c., &c., all high-The first premium was awarded to this fence delphia, 1857. The Treas n of General Lee.

Last evening an approciative audience assembled at the Hall of the Historical Society, to hear a paper read by Mr. Geo. Henry Moore, Librarian of the New York Historical Society, on the life and character of Major General Charles Lee. The most important points of the lecture rested upon documents which have never been given to the public, and which were received with thrilling in-terest. We can give but a meagre outline of

Gen. Lee, was born in England, and it is Lee's ambition to be Commander-in-Chief of the American Army, and although this position could not be given him, yet so high and tion could not be given him, yet so high and actually tremendous. It is now known also that General Lee corresponded with General Burgiyne, and that, whatever else he revealed to him, it is certain that he made known the negotiations between the American and French government, and it was with a sensation of mingled sorrow and disgust that the Society thus found General Lee proved a traitor. Disgust, however, predominated, as it was seen that subsequent to this correspondence with Burgoyne, and this plan laid before the British Commissioners, that Lee, taking

A Volunteer Bull Fight.

I remember once seeing, when a lad at school, a fight between two bulls. Although I could not have been more than eight years f age, I shall never forget the spectacle. It happened in this wise. Close by the school-house—a very unpretending edifice it was ran a deep and rapid river. Across it had been thrown a high wooden bridge, the hand diggins in that vicinity. It was a splendid Surjective to the diggins in that vicinity. It was a splendid Surjective to the diggins in that vicinity.

All at once the bellowing and roaring of All at once the bellowing and roaring of two bulls, that had broken out of their enclosures on each side of the river, attracted attention. The animals were not yet in sight of such other, but were approaching along of each other, but were approaching along the highway at a rate of speed which would cause them to meet near the centre of the high bridge which I have described and be-

sprang into the fields, and ran. Finding, however, that we were not pursued, we hasti-

There they were, the ferocious duelists, quite as sensibly employed as some of their uman imitators. Front to front, their horns locked, every muscle strained, they were fighting as only bulls can fight. It seemed an even match. Now one would press back

In about five minutes both bulls might be seen, well sobered by their ducking, dripping wet, scratching up the steep, gravelly banks, each on his own side of the river. 'Those bulls will never fight any more," said a boy behind. His prediction turned out correct; for two more peaceably disposed bulls than they, ever afterwards, could not have been found.

Ayer's Sarsaparilla

A compound remedy, in which we have labored to produce the most effectual alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found

of the following complaints:—
SCHOPULA AND SCHOPULOUS COMPLAINTS, RESPITIONS AND EXEFTIVE DISPASSE, ULCRES. PIMPLES, BLOTCHES, TUMORS, SALT RHEUM, SCALD HEAD, STPHILES AND SYPHILITIC AP-PROTIONS, MERCURIAL DIREARS, DROVET, NEW-RALGIA OR TIC DOULOUREUX, DEBILITY, DYS-PRIPALA AND LEDGEMETON, EXTRIPELAS, ROSE OR ST. ANTHONY'S PIRE, and indeed the whole class of complaints arising from Incustry or

THE RECOR.

This compound will be found a great pro-moter of health, when taken in the spring, to expel the foul humors which foster in the blood at that sesson of the year. By the time-ly expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the ritiated blood whenever you find its impurities bursting through the skin in pimples, eruptions. or sores; cleanso it when you find it is obstructed and aluggish in the veins; cleaned it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleaning the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no asting health. Sooner or later something must go wrong, and the great machinery of

life is disordered or overthrown. Sersaparilla has, and deserves much, the reputation, of accomplishing these ends. But world has been egregiously deceived by preparations of it, partly because the drag for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sursaparilla,

or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarapa-rilla, but often no curative properties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Barssparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy which rests upon it. And we think we have ground for clieving it has virtues which are by the ordinary run of the diseases it is intendd to cure. In order to secure their complete eradication from the system, the remedy should be judiciously taken according to directions on

The Liver Invigorator, DREPARED by Dr. SANFORD, compounded entirely from GUMS, is one of the best Purgative and Liver Medicines now before e public, that acts as a Cuthartic, easier, milder, and more effectual than any other medicine known. It is not only a Cathartic, but a Liver remedy, acting first on the Liver to eject its morbid matter, then on the stomach and bowels to carry off that matter, thus accomplishing two purposes effectually, without any of the painful feelings experienced in the operations of most Cathartics. It strengthens the system at the same time that it purges it; and when taken daily in moderate doses, will strengthen and build up

with unusual rapidity.

The Liver is one of the principal regulators of the human body; and when it performs it functions well, the powers of the system are fully developed. The stomach is almost entired by dependent on the healthy action of the Liver for the proper performaceofitafunc- tions; when the stomnch is at fault, the lowels are at fault. and the whole system suffersinconsequence of one organ—the lives—having consect to do its duty.— For the diseases of that organ, one of the proprietors has made it his study, in a practice of more than 20 years, to find some remedy wherewith to counteract the many derangements to which it is limbs.

To prove that this remedy is at last found, any person 22 troubled with Lives COMPLAINT, in any of its forms, has but to try a bottle, and conviction is certain. These Gums re- move all morbid or bad matter from the system, supplying in their place a flow of Z bile, invigorating the stomach, causing food to digest well, PERI-FYING THE BLOOD, giv-02 ing tone and health ot the whole machinery, removing the cause of the disease—effecting a radical cure. BILIOGS ATTACKS are cured, AND, WHAT IS

BETTER, PREVENTED, by the occasional use of the Liver Invicorator.
One dose after enting is sufficient to relieve the stomach and prevent the food from rising and souring. Only one dose taken before retiring, pre-

venta Nightmare. Only one dose taken at night, loosens the bowels gently, and cures Costiveness. One dose taken after each meal will cure Dyspersia. One dose of two tenspoonfuls will alvays relieve Sick Headache.
One dose taken for female obstruction re-

moves the cause of the disease, and makes a Only one dose immediately relieves CHOLICA while One dose often repeated is a sure cure for

CHOLERA MORBUS, and a preventive of CHOLERA. Only one bottle is needed to throw out the system the effects of medicine after a long sickness.

One bottle taken for JAUNDICE removes

all sallowness or unnatural color from the skin. One dose taken a short time before eating gives vigor to the appetite, and makes food digest well.

One dose often repeated cures CHRONIC DIARRICZA in its worst forms, while SUMMER find Bowze complaints yield almost to the arst dose. One or two doses cure attacks caused by Worms in Children; there is no surer, safer, or speedier remedy in the world, as it never

purchased the Right for Adams county of Morrison's Patent Portable Fence, a simple frame to connect the punnels of fence, by which the use of posts is dispensed with, and at about one-third the menule cost. This frame is hold together.

Dr. J. b. Warfield, Westminster, Md. brief the menule cost. This frame is hold together. third the usual cost. This frame is held together by means of a simple holt connecting the pan-nels, and keeping them in an upright position; then, by driving two pins into the ground, thro' (Geo. E. Wampler, Esq., the ends of the sills, the fence is made perma-nent, as well as portable. It requires but little skill in its construction, and takes but half the time required to make a common hoard fence; the frames are made without a single mortice. the pannels are nailed up with strips on each side, and can be set up in a few moments. It from place to place, thus enabling the farmer to dispense with half the fence required when stationary is used—and from the fact that middle the fence tha fences can be entirely dispensed with by merely using portable fence for pasture lots alone.

By this process one-third of the grass is saved

that is generally overran in pasturing, by merely fencing the quantity required, besides saving at least five acres of land to the hundred that is necessarily taken up with fence when stationary fence is used for inside fencing, all the land heing formed alternately, it gives no chance for briers and other rubbage that usually grow up along fences. This fence can be used to great ivaninge on low or wet land, where it is difficult to set posts, merely requiring longer pins than for dry ground. The advantage also, of moving the fence, when streams overflow, that are likely to float it off, and the convenience it affords, in fencing pasture and other lots, for stock, enclosing grain stacks, &c., &c., all highly recommend its practical use to the farmer. The first premium was awarded to this fence at the Pennsylvania State Fair held at Phila- , patronage of the public, delphia, 1857. MY LITTLE ROOM. Siegler's Stores, Baltimore et., Gettysburg, Pa. While sitting alone I have sometimes thought May 9, 1859. 6m That my little room was a fevered spot That my little room was a favored spot, With its pleasant blinds, and its curtains white, Through which the sun comes so clear and bright. Before it, away stretch the meadows green-Beyond, in the distance, tall mountains are seen; And I sometime, hear the murmuring rills That are winding their way o'er the pleasant hills. Quite often, too, do the little birds come. To sing me a song on my pleasant home, They sit on my window awhile, and then My flowers will soon bloom fresh and fair,

> Be filled with their sweet and pleasant perfume I can sit by my window and see the sun rise, Giving beautiful tints to the eastern skies; I can see him all day rolling proudly on; And Hove to gaze on the setting sun.

(For I have a lovely garden here.)

Fair Cynthia too with her pleasant light Shines in and dispenses the gloom of night, And very inviting is my little room When cheered by the light of "the sweet, silver moon."

My own little room has charms for me, Which never when absent from it I see. For there are my parents, with eyes of love, And seldom far from my home I rove. Oh! my little room is a beautiful spot, And has charms for me which in vain I have sough In the giddy rounds of folly and mirth, But which ever linger round the social hearth. May, 1859.

As the time of this movement corresponds with the statement of this remarkable plan of General Lee, and as the plan in most respects was one of great ingenuity, Mr. Moore considered it if not probable, that the British General (Howe,) in the plan of operations which he adopted, was following out the suggestions of Lee. It is now known also that General Lee corresponded with General Burg yne, and that, whatever else he revealed to him, it is certain that he made known the negotiations between the American and French government, and it was with a sensation of mingled sorrow and disgust that the Society thus found General Lee proved a traitor. A Volunteer Bull Fight.

I remember once seeing, when a lad at school, a fight between two bulls. Although I could not have been more than eight years of age, I shall never forget the spectacle. It happened in this wise. Close by the school-house—a very unpretending edified it was—ran a deep and rapid river. Across it had been thrown a high wooden bridge, the hand railing of which time, and the winds, and the

Gen. Lee, was born in England, and it is said entered the British army the age of 11; after serving there for a number of years, he entered the Polish service and was appointed.

Aid-de-camp to the Polish King. He after wards re-entered the English service, but he coming disgusted, with what he conceived to be the word of proposition of his military.

The highway at a rate of speed which would cause them to meet near the centre of the high bridge which I have described and beneath which at some thirty feet ran the river, between steep banks. The more daring of us gathered near the bridge, lining it, to see the anticipated fight. We were not disappointed. Nearer and nearer they appointed. Nearer and nearer they appointed. Nearer and nearer they appointed. Nearer and nearer they appointed the proposition of his military.

But down he went; the water was deep and he disappeared, leaving a whirlpool of foam behind him, and making

the river undulate far and wide with the con cussion of his nonderous bulk. The other did not laugh-merely because bulls, as I supposed, could not. But we laughed and shouted our applause. There stood the victor, looking directly down into the abyss below, into which he had hurried his unlucky foe. He stood, however, but a moment, and then, as if frightened at the prospect, he began to snort and step back-Back, back he retreated, with his head in the same pugnacious attitude as when in combat-back-still another step back-

In about five minutes both bulls might seen, well sobered by their ducking, dripping wet, scratching up the steep, gravelly banks, each on his own side of the river.—
"Those bulls will never fight any more," said l boy behind. His prediction turned out correct; for two more peaceably disposed bulls than they, ever afterwards, could not have been found.

Mock Masonry.

In the early days of the State of Indiana, the capital was Corydon, and the annual sessions of the General Assembly usually sessions of the General Assembly usually brought together as wild a set of mad wags as could be found in the State, who had to rely upon their own resources for amusement, for there were then few theatres, concerts, or shows. These lovers of mischief had established a mock Masonic Lodge, into which they would entice such as were a little green, and take them through a variety of ridiculous ceremonies, to the infinite amusement of the ceremonies, to the infinite amusement of the crowd. > Important Decision as to Contracts Falling the Superior Court, Columbus, in which Lucien A. Bowers brought suit against Ira has been raised and decided in the Superior as damages for alienating the affections of the particular case was that of a policy of life insurance expiring on Sunday, the premium upon the renewal of which was not tendered of alienating said wife's affections, and gave till the following Monday. But the discussion involved the whole question as to fulfillby the Courts, that in Ohio, the value of a ing any contract, the day for doing which came upon Sunday. The general notion is that in all such cases the contract must be performed, or the offer made to do it, on the preceding day. But the court in this case overruled the motion, and declared that when from accident or mutual error, the day of fulfilling an agreement falls upon Sunday. there is enough of principle and authority to justify the party in deferring his performance to the Monday ensuing, without impairing a right or incurring a forfeiture.

Mike Walsh and His Brothers .- The Memphis Avalanche has the following interesting reminiscences concerning the brothers of Mike Walsh :- The children consisted of four brothers and a sister, of whom Mike was the voungest, that had been scattered in all directions upon the death of their father. Mike alone remained with his mother. A most singular fatality befell them all. One of the brothers was shot in a duel, across a table in a Southern city; another fell by the side of the brave Creeket at the massacre of the Alamo; the third brother was burned in the Ben. Sherrod, and the sister perished in the ill fated Lexington. The mother soon-followed her children, leaving poor Mike to meet his death under circumstances more terrible

Concealed Deadly Weapons .- The Ohio Legislature have passed a law making it a misdemeanor to carry a pistol, bowie knife, dirk or any other concealed deadly weapon, under the penalty of a fine not exceeding \$200, and imprisonment not more than thirty. days, for the first offence; and \$500 fine and imprisonment for three months, or both, at the discretion of the Court, for the second offence; and in pursuance of the law, the Mayor of Cincinnati has directed the police to arrest and bring before him all persons whom they shall find with concealed weapons.

than any of the rest.

A Family Puzzle .- The family of Mrs. La. cinda Burr, of North Wilbraham, according to the Palmer Journal, consists of one father, three mothers, two grandmothers, one greatgrand mother, two widows, three children, one husband, one wife, two daughters, one grand-daughter, one son, one grandson, one great-grandson, one mother-in-law and one son-in-law; yet the family numbers but five persons, who all live under the same roof.

Smokers Should Avoid Salem .- The City Council have forbidden the smoking of cigars in their streets, in the evening, under a pon-alty of three dollars for every offence, and, what is more to the point, the police are en-

forcing the law. A Chance.-Any "respectable" man, who wants to marry ten thousand dollars with a wife thrown in, has the opportunity offered him. We see it stated that "the chief of a hand of gipsies encamped near Indianapolis, offers the hand of his daughter, with a dower of \$10,000, to any respectable man who will marry her." The "gall" will be in demand.

How Will it Affect Us?

With the instinct of true Yankees, this is the

question generally asked all over this country when speculating upon the probable consequences of the European war. How will it affect us? Our position and national policy secure neutrality, no matter what other govrnments become involved in the great strugzle, but commercially we have an incalculable nterest in European affairs, which nust tell, in some shape, to our advantage or

disadvantage upon the business of the country. Europe cannot engage in a general war, drawing hundreds of thousands of men from their peaceful occupations, deranging the finances and intercepting the peaceful current of commercial intercepting the peaceful current a most material effect upon the business of this country. We are therefore interested to know whether that effect will be beneficial or damaging.

[17] Not one complaint has every their peaceful as ATS and var priest direct. ry. Europe cannot engage in a general war,

At first sight, it may appear advantageous to this country. If the nations of Europe are involved, the soldiers must be taken from the tillers of the soil, and America become part granary of Europe. . The deficiency of breadstuffs produced by untilled fields, devastated crops, and the waste of war, must be supplied the agriculturists of the United States. All the nations of Europe must maintain an army on a war footing, even if they do not become involved in actual hostilities, and this will necessarily diminish the agricultural products, and produce a demand for American breadstuffs. We see the effect of this anticipation already in the sudden rise of flour and grain, caused by the warnews. This is doubtless caused to some extent by speculative combinations, but even speculators cannot operate without a plausable basis of probabili ties to go upon.

But it is at least questionable whether these advantages would not prove temporary and In spite of high prices, we might find ourselves at the end of a long and prostrating European war, in a worse condition than at its commencement. The general business of the country could not fail to be sympathetically affected, and the life of commerce paralyzed .- Patriot and Union.

Burned to Death while Making Her Weding Dress.—A melancholy accident happened a day or two ago to a young lady named

latilda Sawyer, residing in Port forvis, N. Y., by which she lost her life. She was sitting up engaged in making her wedding dress, by the aid of a light from a fluid lamp. Finding that the fluid was nearly consumed in the lamp, she attempted to fill the lamp from the camphen can, leaving one wick burning; but no sooner had the light touched the fluid than it communicated to the can, which burst, scattering the contents all around, and seting fire to her dress. Before the fire was exinguished she was so terribly burned that death followed shortly after.

THE OXYGENATION

THE OXYGENATED BITTERS -Nature, in her great labratory, has stored some remedy adapted to every dis-case which "flesh is heir to." But it requires the investigation and research of the philosopher to discover and apply this remody. Such research and investigation has succouled in discovering a remedy for that most afflictive dispensation, the DYSPEPSIA, with all its lesser and numerous ovils; and it may be safely asserted that until the appearance of the Oxygenated Bitters a case of Dyspepsia cured, was a rare experience in medical practice. The Sickles' Trial FOR THE SHOOTING OF KEY, and the Ex-

ecution of Four Murderers in Baltimore has created the greatest excitement. The papers are filled with details of these shocking afpers are filled with details of these shocking al-fairs. The people talk about it on the streets and in their houses, and look upon these trage-dies as being unparalicled in history. So it is with PICKING SCLOTHING—having just opened the largest and most complete, as well as the cheapest and best assortment of READY-MADE CLOTHING, of every description and style, ever offered in this place, the people talk about it on the highways and in their houses, urging each other to go at once to Picking's and purchase a new suit of clothes. But joking aside, we assure the public in all candor that our stock cannot be surpassed-consisting in part of Black Cloth Coats, Cassimere Frock and Sack Coats, Tweed and Linen Coats, and in fact every kind that the market can produce. Vests of every description. Pauts to suit all classes and conditions. Shirts, Collars, Stockings, Gloves, Suspenders, &c., &c. Also, Carpet Bags, Umbrellas, Trunks, Accordeons, Violina, in short everything usually found in his line. Thankful to show goods. Ayer's Sarsaparilla

A compound remedy, in which we have la-

that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst cases to be found

PIMPLES, BLOTCHES, TUMORS, SALT RINEUM, SCALD HEAD, SYPHILIS AND SYPHILITIC AP-PRECTIONS, MERCURIAL DISEASE, DROPSY, NEU-BALGIA OR TIC DOULOURBUX, DEBILITY, DYS-PEPSIA AND INDIGESTION, ENTSIPHIAS, ROSE on St. Anthony's Fire, and indeed the whole class of complaints arising from Inputary or

moter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where no particular disorder is felt, people enjoy better health, and live longer, for cleaning the blood. Keep the blood healthy, and all is well; but with this pabulum of life disordered, there can be no lasting health. Sooner or later something

Sarsaparilla has, and deserves much, the reputation, of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilia,

or any thing else. During late years the public have been mis-led by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick, for they not only contain little, if any, Sarsapa-rilla, but often no curative properties whatev-er. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the name itself is justly despised, and has become synonymous with imposition and cheat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the upon it. And we think we have ground for believing it has virtues which are irresintible by the ordinary run of the diseases it is intended to cure. In order to secure their complete eradication from the system, the remedy should be judiciously taken according to directions on the bottle.

has won for itself such a renown for the cure of every variety of Throat and Lung Complaint, that it is entirely unnecessary for us to recount the evidence of its virtues, wherever it has been employed. As it has long been in constant use throughout this section, we need not do more than assure the people its quality is kept up to the best it ever has been, and that it may be relied on to do for their relief all it has ever been found to do.

The Liver Invigorator, DREPARED by Dr. SANFORD, compounded entirely from GUMS, is one of the best Purgative and Liver Medicines now before public, that acts as a Cathartic, easier. milder, and more effectual than any other medicine known. It is not only a Cathartic, out a Liver remedy, acting first on the Liver to eject its morbid matter, then on the stonach and bowels to carry off that matter, thus accomplishing two purposes effectually, without any of the painful feelings experienced in the operations of most Catharties. It strengthens the system at the same time that it purges it; and when taken daily in mod-

rate doses, will strengthen and build up with unosual rapidity.
